Sheet - 5

Name: Karishk Srivastava

Date: 19 October 2025

Title: Final Layout

Description:

This is what the web page should ideally look like, explaining the domain

Components / Operations

- Contains Year slider and metric slider

Year 2021 Metric

- Colour hues for different stats
- Confirmation if map loads correctly

Details

- Detailed datasources
- Visually aesthetic
- Information is easy to understand
- Text explains graphs too

Parti / Focus

- Readers start with a map with dropdown menus for various years and different metrics
- Texts alongside graphs and maps help explain what the user is reading and helps gain a deeper insight
- Different colour hues make it visually aesthetic and easy to understand

Big Picture/Layout

Sheet - 4

Name: Kanishk Srivastava

Date: 19 October 2025

Title: Clustered Represent

Descriptions:

Only contains graphs and one map all together

Components/Operations

- Different colours represent different metrics
- Text gives a good story to explain it to the user

Pros & Cons

- ### Parti/Focus
- Main point is divided through the whole web page
 - Heat Map helps visualise distribution and tooltips for different years
 - Multicoloured graphs make it look user friendly.

- Simple to implement
- Easy to Understand
- Too clustered
- Not properly placed

Big Picture / Layout

Migration In Australia

Text ~ ~ ~ ~
~ ~ ~ ~

Part / Focus

- Main focus is the text next to the graphs

- Focuses on explorability as user goes through more

Sheet - 3

Name: Kanishk Srivastava

Date: 19 October 2025

Title: Big Text Layout

Description:

Big text and Graphical Layout helps easy understanding

Components / operations

- Tool tips help with explorability
- Text everywhere makes it easy to understand

Pros & Cons

- Too much text
- Less data visualisation
- More text

IDEAS

X → Screen Time (hrs)

Y → Academic Score

Y → Sleep (hrs/night)

Y → hrs/day Participation Rate

For different (5-8) age groups

(9-12) Yrs

X → Year (13-16) Yrs

Comparator

Yrs participation/Score

QUESTIONS

1. Is this data visualization achievable?
2. What colours to use?
3. Does it give insight per client?

Big Picture / Layout

① Scatter Plot

- Sport participation % and Sleep hrs/night
- Different Colours

② Comparator: Direct Comparison between states for participation and sleep

Part / Focus

- No main focus, all graphs are important, but size difference is there to emphasize readability and easier analysis

- Only have 2 main graphs showing only important info.

- Use different colours in order to show different gender, state, sport type

Sheet 2 ■ Refinement
Name Karishk Srivastava
Date 23 August 2025

Title The trend spotter & The Comparator

Description

This sheet explains how the data is through trend spotting and comparisons

Components / Operations

State ▾
QLD
VIC
ACT

→ Propdown bar for scatter plots for different states

- The different colour hues in line plot, each colour represents either state or sport type and have a selection dropdown bar for yrs selection

2018 ▾
2018-20
2020-2021
2022-2023

- The bar graph could have a slider for age groups

Pro & Cons

- High Impact: Easy to understand
- Clear Rankings: State ranking is clear in the diverging bar chart
- Encourages exploration: user needs to interact in order to gain insight
- Too much data: data overload
- Too many texts and colours
